

**DIRECTIVE 2008-24**

February 19, 2008

To: All County Boards of Elections

Re: Survey – transport of ballots and voting equipment

The Secretary of State's office is continuing to gather information from boards of elections in an effort to further mitigate security risks identified in the "Report of Findings" produced from Project EVEREST. Directive 2008-02 requested responses to survey questions related to concerns on the security and performance of your county's voting machine system; and requested cost estimates relevant to specific expenses related to particular voting system expenses.

The attached survey requests information regarding your board's procedures on the delivery of voting equipment to your presiding judges and the transport of ballots or memory cards from the polling place on election night.

Please provide your responses to the survey no later than Friday, February 29, 2008.

Sincerely,

Jennifer Brunner
