

VOTING WITH THE CLEARCAST™ TABULATOR

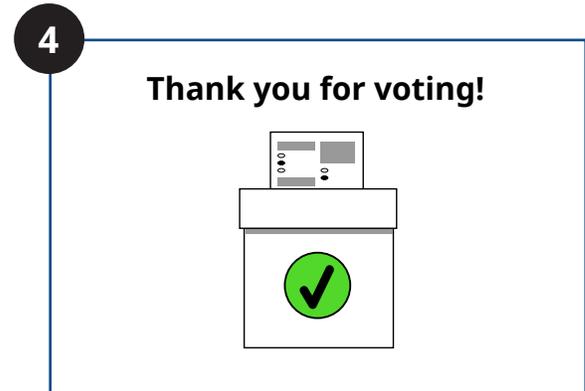

1 The voter marks their ballot.

2 Voter places marked ballot into ClearCast scanner.

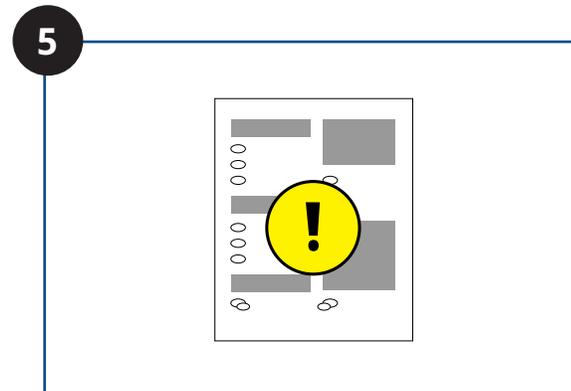

3 The voter waits for the tabulator to process ballot.

4 The tabulator either alerts voter that their ballot has been cast, or returns ballot to the voter (see next panel).

Text

5 In the event a ballot is returned, the tabulator indicates the reason with an alert message.

6 The voter chooses for the ballot to be returned for revision, or to submit as is.
